Likhil Sharma

SOFTWARE ENGINEER | BACKEND & CLOUD

Virginia, USA | +1 227 238 9516 | likhilsharma1@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Software engineer with 5+ years of experience building distributed backend systems for financial and enterprise platforms. Experienced in Java, Kotlin, Spring Boot, high-volume data processing, AWS, and Kubernetes, with current work on Atlassian cloud migration.

PROFESSIONAL EXPERIENCE

Software Engineer | Hexaware Technologies **Jun 2022 - Present**

McLean, VA

- Working on an Atlassian on-premises-to-cloud migration, converting scripts using ScriptRunner and HAPI and working with Forge apps; using FredAI to support the project.
- Architected a multithreaded reconciliation framework across DB2, MongoDB, and PostgreSQL, validating billions of records and reducing validation latency by 50%.
- Designed and scaled Java and Spring Boot microservices for high-volume mortgage-backed securities transactions in a fault-tolerant architecture.
- Reduced batch processing time by 50% through parallel execution, query tuning, and index optimization.
- Integrated Kafka and AMQ for asynchronous reconciliation workflows, reducing manual intervention by 70%.
- Reduced REST API latency by 25% through query restructuring, caching, and removal of redundant service calls.
- Deployed containerized microservices on Kubernetes (EKS), enabling horizontal scaling and resilience under peak load.
- Designed environment-agnostic configuration to support schema evolution across development, testing, performance, and production environments.
- Implemented JWT authentication for message retrieval services and reduced production defects by 30% through logging, validation, and observability.

Technical Analyst | Infosys Limited **Aug 2021 - Jun 2022**

Providence, RI

- Led migration of a legacy trading platform to Kotlin and Spring Boot microservices, improving scalability and reducing deployment downtime.
- Designed REST APIs for multi-screen trading workflows with high availability requirements.
- Developed responsive front-end modules using React and TypeScript.
- Increased test coverage to 95% through JUnit automated testing and CI validation workflows.

Full Stack Developer | Freelance **Jan 2018 - Jun 2019**

India

- Led end-to-end development of Promptly Journals, a client e-commerce platform.
- Developed responsive interfaces using React, JavaScript, HTML, and CSS.
- Built and maintained Node.js backend services and integrated REST APIs for data exchange.
- Coordinated requirements, progress updates, and deployment directly with the client to deliver on time.

TECHNICAL SKILLS

Languages: Java, Kotlin, Python, Go, C++, JavaScript, TypeScript
Backend and frontend: Spring Boot, REST APIs, microservices, React, Node.js
Cloud and migration: AWS (EC2, S3, Lambda, EKS, CloudFormation), Kubernetes, ScriptRunner, HAPI, Forge
Data and messaging: DB2, PostgreSQL, MongoDB, MySQL, Kafka, AMQ
Other: FredAI (AI tool), multithreading, concurrency, JWT authentication, JUnit, Jest

EDUCATION

University of Maryland, Baltimore County | MS, Computer Science | 2019 - 2021
Acropolis Institute of Technology and Research | BE, Information Technology | 2014 - 2018
